DETAILED ACTION

1. Claims 1-11 are pending in this application. The examiner noted that there are three claims set dated 02/21/2006. The two claims sets have only 10 claims and the other set has 11 claims. For the purpose of this restriction, the examiner is considering the claim set with 11 claims. Applicants have to clarify this issue in response to the restriction requirement.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11 (in part), drawn to 1,2,4-oxadiazine compounds where R'HN-C=N-R together form a 1,2,4-oxadiazine ring (see compound 5 at page 17).

Group II, claim(s) 1-11 (in part), drawn to 1,3-imidazole compounds where R'HN-C=N-R together form a 1,3-imidazole ring (see compound 6 at page 17).

Group III, claim(s) 1-11 (in part), drawn to R = other heterocyclic ring.

Group IV, claim(s) 1-11 (in part), drawn to R = others.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical

feature of Group I is a 1,2,4-oxadiazne ring and is different from the special technical feature of Groups II-IV. The special technical feature of Group II is a 1,3-imidazole ring and is different from the special technical feature of Group I or Groups III-IV. The special technical feature of Group III is other heterocyclic rings that are formed by R and R' or R = heterocycle (e.g. compound 2a at page 16) and is different from the special technical feature of Groups I-II and IV. The special technical feature of Group IV is others (i.e. non-heterocyclic, e.g. alkyl, phenyl) and is different from the special technical feature of Groups I-III.

If applicants elect Group III or Group IV, they have to elect a single disclosed species from the specification.

A telephone call was made to Mr. Mark Nuell on 10/24/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
